

TEL-TRU
MANUFACTURING CO.
Temperature + Pressure Instruments

Attention valued customer:

Thank you for using the Tel-Tru Check-Set Calibrator for your temperature measurement verification needs. The Check-Set design has certainly stood the test of time, but over the years several of the components used in older models have become obsolete.

Due to the uncertainty of these parts, we will be able to extend the warranty only for units less than 10 years old. To verify the age of your Check-Set, please contact one of our Customer Service representatives at 800-232-5335. This change will not affect the warranty on units that have already been recertified within the last year.

If you have a model that is more than 10 years old, we're still able to offer recertification. We may also be able to repair units, but only until our inventory of the obsolete parts runs out.

In order to ensure uninterrupted service, we would like to extend a special limited-time trade-in offer:

- We will replace your existing unit with a new model at 10% off the purchase price of the replacement.
- We will include the first recertification free of charge (a \$175 value for Check-Set II models and \$310 value for the Check-Set IV models). This complementary recertification will be available upon receipt of your trade-in unit.
- Your new unit will be sent to you immediately and you can send your old unit in within 30 days of purchase.
- If your Check-Set is less than 10 years old and you would like to take advantage of this special trade-in program, you are welcome to do so as well.

To take advantage of this offer or get answers to any questions you may have please contact our Customer Service team at 800-232-5335.

We strive to make all of our products as durable and dependable as possible to assure you get your money's worth. We will make every effort to make your transition from your older model as painless as possible. Again, thank you for using the Tel-Tru Check-Set.

Best regards,
